

PRO V2

An **intermediate, non-lethal** threat response
with **layered defense options**,
incident recording and command center
two-way communication.

Designed by security industry leaders to revolutionize how
companies provide a safe working environment and mitigate risk.

Guardian 8 Corporation is a publicly traded company. Its stock is available
for purchase on the OTC Bulletin Board under the symbol GRDH.

Layered Defense
Low Impact De-escalation
and Risk Management

LAYERED DEFENSE

Increasing levels of non-lethal response to de-escalate a threat

LEVEL 3 RESPONSE

OC Stream

laser aimed non-lethal incapacitation of aggressive subjects from up to 10 feet away

LEVEL 2 RESPONSE

Bluetooth Command Center Communication Link

sends alert message via cell phone & enables push-to-talk communication

Alerting Siren

calls attention to scene and creates confusion for unsuspecting subject

Strobe Light

disorients subject and reduces subject's night vision

LEVEL 1 RESPONSE

Laser Spotter

delivers important warning to any subject with clear message to "stand down"

Camera

records both still and video images

Incident Auto-Record

automatically captures and stores audio and images when armed

RISK MITIGATION

Improves Command Center Communication

automatically links officer to support – eliminating the distraction of reaching for phone or two-way radio during incident

Simplifies and Enhances Reporting

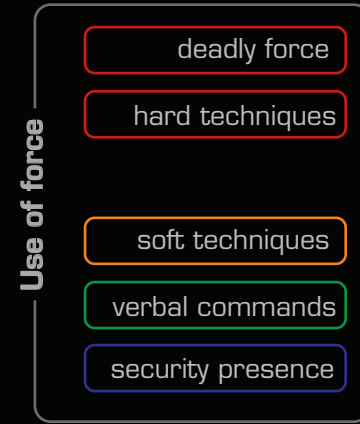

stores recorded audio and image evidence to eliminate reliance on memory as the sole source of documentation

De-escalates Threat and Lowers Risk

ends confrontation with least amount of force necessary

LOW IMPACT DE-ESCALATION

The G8 Pro V2's tools allow security to choose a reasonable and appropriate response to a threat, with layered defense options, assured communication and incident documentation.

- oc stream
- laser spotter
- strobe
- alerting siren
- enhanced presence

Class 3R Laser Product (<5mW 655nm CW). Laser light, avoid direct eye exposure.
